FARE-RIDE LLC

Section 8 | Electronic Receipts

DRAFT - PLANNED / NOT YET IMPLEMENTED

Prepared October 28, 2026. Proposed attachment for the Louisiana Transportation Network Company permit application. This document describes intended procedures; it does not certify current compliance.

1. Proposed receipt delivery

After each completed prearranged ride, Fare-Ride will automatically transmit an electronic receipt to the rider on behalf of the driver within a reasonable time. The planned app will deliver the receipt to the rider's account and notify the rider when it is available. Receipts will remain accessible through trip history.

2. Receipt contents

Each receipt will identify the trip origin and destination, duration, distance, and total fare paid. Fare-Ride also plans to show the trip date, a unique trip reference, and an itemized breakdown of applicable fare components, fees, tolls, taxes, discounts, and tips. Payment status will be accurate; unpaid amounts will not be represented as paid.

3. Delivery failures and corrections

The planned system will log receipt creation and delivery, retry failed delivery, and flag unresolved failures for support review. Fare disputes, missing receipts, and correction requests may be directed to fairride2all@gmail.com or (516) 376-4118. Corrected receipts will identify any adjustment or refund.

4. Implementation and adoption

Status: planned, not yet built or tested. Before certifying compliance, Fare-Ride must implement and test automatic receipt delivery, required trip and fare fields, rider access, and failure handling. This draft is for the working application packet and must be updated to reflect actual implementation before submission as evidence of compliance.
